

MARCH 2018

The price list PARTS 2018 is on the website now.

This time a big difference with foregoing years

Almost 40 years at page 1 – 10 you could find parts of Tekno

These were parts of older models that have been produced in Europe

On one hand the demand is getting less and less and on the other hand more and more parts are sold out now

Therefore there is no sense to show these pages any longer on our website

At the first page under PARTS you will find a survey of what is no longer available and what, on request, might be available.

Nowadays all parts of Tekno are produced in China and the last couple of years we took up a number of attractive parts, mostly accessories.

If you do not find a certain part than please let us know. We can order every part from China however not in small quantities. The minimum per part is through 100 pieces
